IoT CS LAC 2021 Report

Since the creation of the group in April 2021 we have carried out and participated in various activities. Similarly, we have collaborated with various organizations in the LAC region.

First of all, we would like to thank everyone who followed us and accompanied us as spectators at our events. We hope we have met your expectations. To all those involved (panelists, participants of the subgroups, other people who collaborated with us) and who from the beginning supported this articulation of these events with specific activities, such as the making of flyers, dissemination, coordination and support during the events, preparation of certificates, among other activities.

We especially thank those who have provided us with support such as the .LAT domain (eCOMLAC), the ZOOM platform (ISOC UY), the transmission of the webinars via ISOC Live (Joly MacFie). Likewise, we want to recognize all those who, with their experience, connection, advice, desire to promote and strengthen the IoT in Latin America, have contributed their time and knowledge to make this group a reality.

The results that have been obtained are thanks to all of you, who have allowed the group to have an important position at a regional and global level in its work to raise awareness, inform and promote the topic of the Internet of Things and its technologies. in organizations that had not taken it into account; as well as the use of good practices and the application of security protocols as a fundamental part of providing reliable and resilient global connectivity, key points that guarantee the proper functioning of communications and data collection to provide social welfare, not only in the LAC region, but throughout the planet.

Events organized by IoT CiberSeguridad LAC

- Inaugural event and panel of experts - 24 Sep 2021
- Low Power Wireless Technologies - 5 Nov 2021
- Security in the Internet of Things - 26 Nov 2021

Participation on behalf of IoT CS LAC in other forums:

- LACNOG 2021 - Lightning talk - Oct 13, 2021
- World Encryption Day - Oct 19, 202

@IoTCiberSecLAC

- debut for CA IoT
- JAIIO / IETF DAY - Oct 29, 2021
- SASE/CASE 2021 - Nov 4, 2021
- IoT and the New Challenges in the Cybersecurity Framework - 11 Nov 2021
- Internet Society Mexico - "ISOC.MX Encryption Day" - Oct 19, 2021
- Internet Society Uruguay - "Current status of IoT security protocols" - 3 Nov 2021
- Internet Society Bolivia - "IoT and the New Challenges in the Cybersecurity Framework" - 11 Nov 2021

This 2021 ends leaving great satisfaction for IoT-CS-LAC. We hope to count with your participation, support and commitment by 2022, only in this way will the initiatives proposed by each one of you make it possible to multiply projects, papers, among other products that allow expanding the scope of this group.

Let's continue to be united through actions promoting and developing knowledge about the Internet of Things and Cybersecurity as a link between our countries and ambassadors of the LAC region!
