

Install rap-client in Ubuntu

Install Go language

```
# apt update  
# apt install golang
```

Install Git

```
# apt install git
```

Get and install the RDAP client Git project files

```
go get github.com/registrobr/rdap-client
```

Install the RDAP client (run again the same from the created dir):

```
# cd go/src/github.com/registrobr/rdap-client/  
# go get github.com/registrobr/rdap-client
```

Set the environment variable (add Go bin to the \$PATH):

```
# export PATH=$PATH:/root/go/bin
```

Test the RDAP client

```
# rdap-client te-labs.training
```
